

## The Benefits Of Retrofitting

We understand it's not always possible to replace your existing locker fleet with smart lockers. So we've made sure you can get all the benefits of eLocker manager, without having to, which means no-one has to miss out.

### Use Existing Lockers

There's no need to replace your existing lockers. Our Retrofit Lock simply replaces the old locks and connects to the eLocker system.

### Cost Effective

Retrofitting doesn't require the purchase or installation of new lockers. Saving you money and making it a highly, cost-effective option.

### Low Operational Impact

We can replace your locks in stages and in rotation. This allows you to continue using other lockers and start using sections of new lockers right away.

### Fast Turnaround

Our retrofitting service is much faster than a new locker installation so we'll have you up and running in no time.

## Make Your Old Lockers, Smart Lockers

You can use our eLocker Manager and contactless locks without the need to replace your existing lockers. We simply take the old locks off and replace them with our Retrofit Lock. We call this process, 'retrofitting'.

### Easy To Install

Our Retrofit Lock is compatible with all EU standard lockers so can easily replace your existing locks.

### Bluetooth Smart Locks

Contactless smart locks make it easy to manage lockers without keys and complicated spreadsheets.

### Complete Solution

Use any of our eLocker systems: Hot Lockers; Allocated Lockers; or Asset Management Lockers.

## Contact eLocker Today For Your Bespoke Quote

We understand every warehouse or office has different requirements, that's why every quote is made to fit your needs.
